Councilmember Floreen Issues Statement on Growth Policy

This growth policy goes over the top. I will not have my name associated with a document that rejects positions of the County Executive, the Planning Board, the Board of Education, the Civic Federation, and the Coalition for Smart Growth, while at the same time creating such significant barriers to the creation of affordable housing. It crosses the line between sound policy and political polemic dressed up as regulation. Worst of all, because it goes so far, it will not generate the revenue nor the solutions we need to address the transportation and education problems our current residents face.
